Municipal Revenue Enhancement and Management Software

What is EasyRates

EasyRates is software that will significantly improve and streamline the collection of much needed revenue, specifically property rates and taxes, by municipalities.

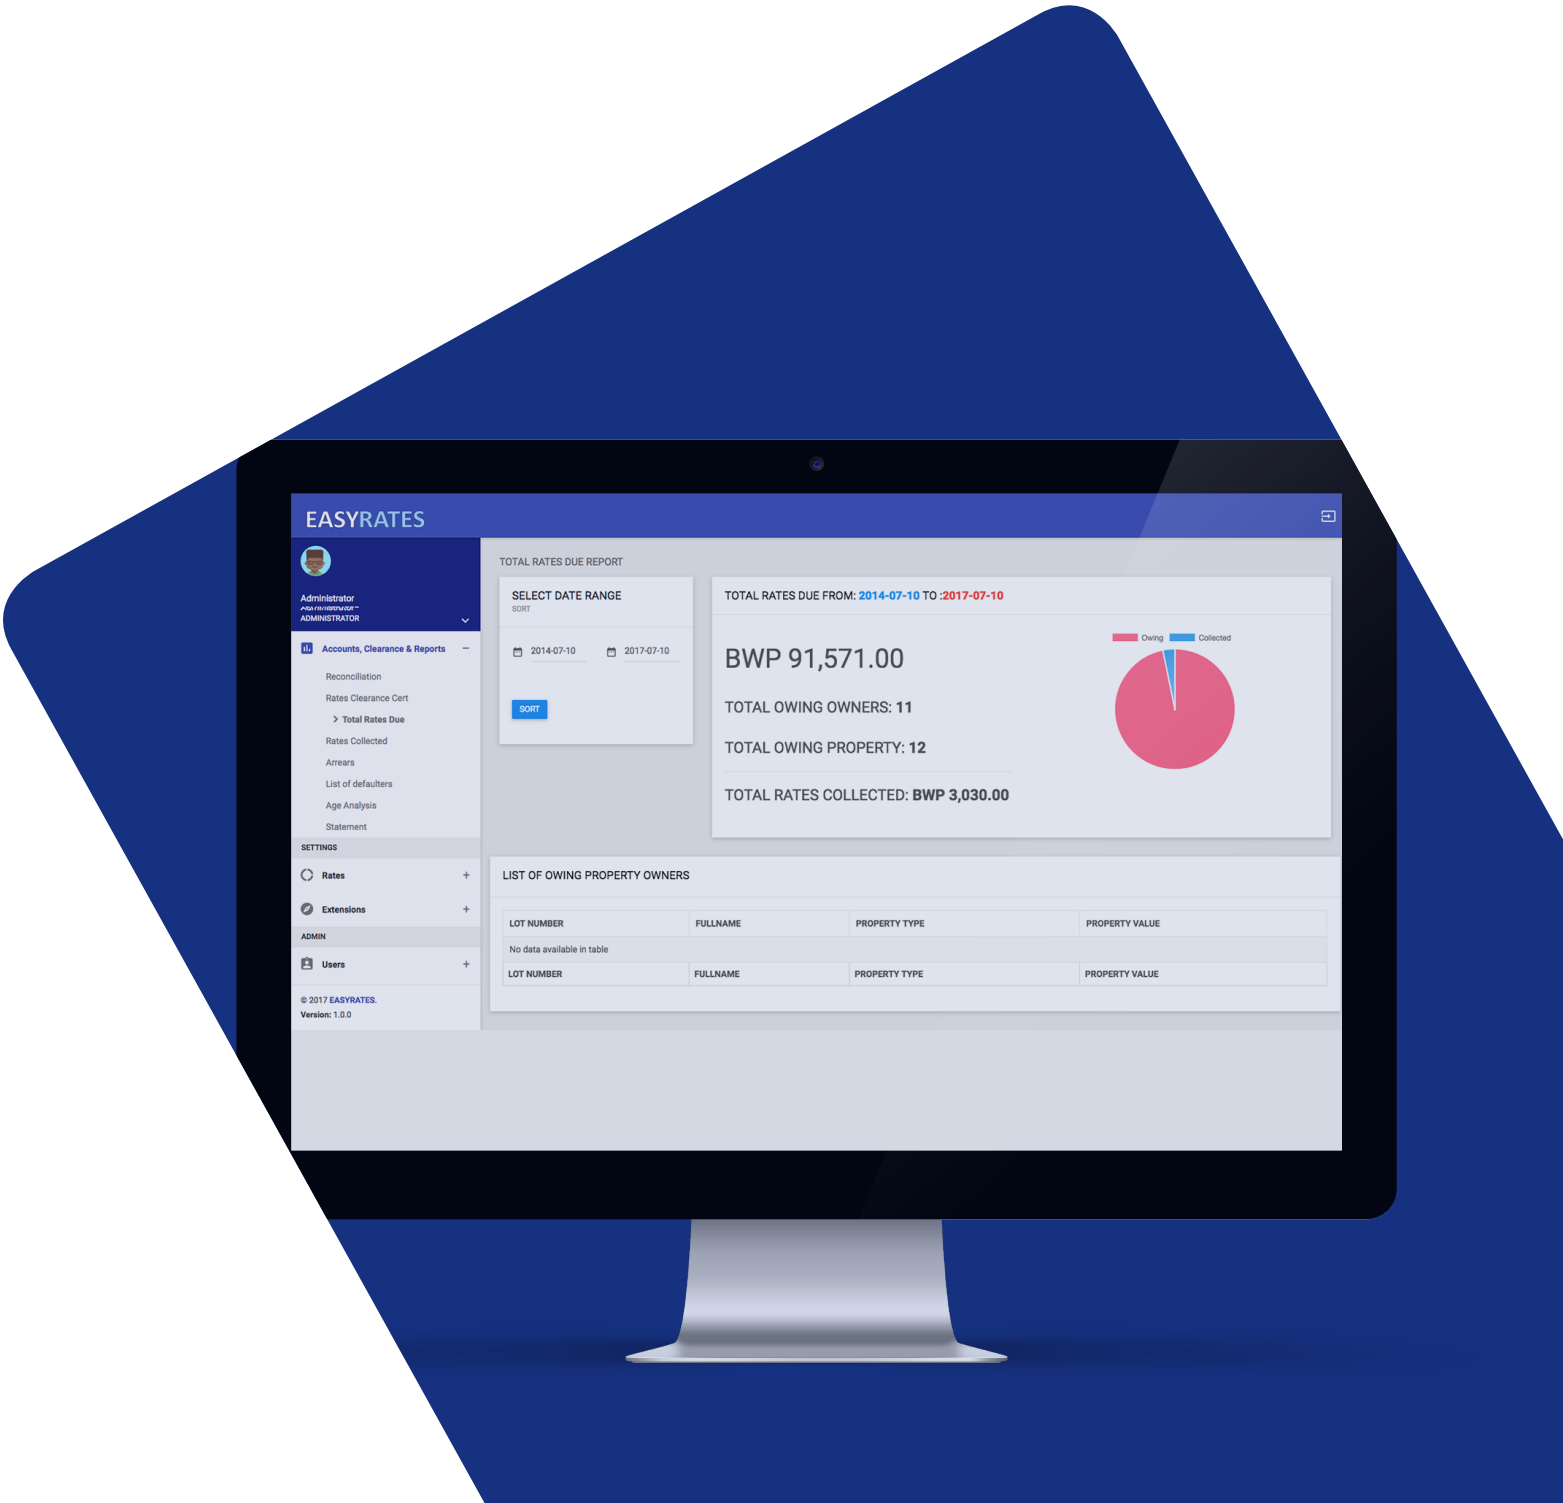

The EasyRates system is a simple yet highly advanced and effective solution to the problems of rates collection.

EasyRates contains features that greatly enhance the process of billing and invoicing of ratepayers, the necessary periodic follow up of outstanding rates and makes provision for special rates and
levies.

The software will interphase with any existing municipal revenue and/or accounting system, to ensure continuity by using existing data and combining it with a first class rates collection and management system.

EasyRates is specifically created to ensure that all processes and procedures are fully compliant with and in accordance with the Townships Act and regulations.

The system automates the various processes of rates collection, thus making it efficient and effective. Some of the unique features of the software include:

Transmission of invoices by sms and/or email (thus reducing paper and printing costs)

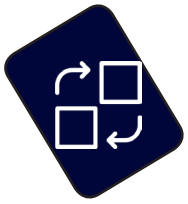

Sms / Email alerts upon payment

Automated and frequent follow-up of outstanding rates and levies

Remote access to the system to enable online rates enquiries by payment agents and tellers

An online system of rates clearance certificates for property transfers

Capability to customize the software to meet the needs of each council

Provision of statistics, data and up to date information on properties in the ratable area and ratepayers

Software licence fees structured favorably to ensure affordability by municipalities

Provision for collection partners such as banks, post office etc.

EasyRates - a highly effective solution to the problems and challenges in the collection of rates by Councils. Use EasyRates today and experience exponential growth of rates and levies revenue.
